

Task 1-

<u>Weekly Task</u>	<u>Category</u>	<u>Why</u>
Attending lectures	Just Me	AI can't replace participation in class.
Learning HTML/CSS/JS concepts	Collaborate with AI	I have to learn but sometimes i cant understand, so taking help from AI
Debugging website issues	Collaborate with AI	When i land into a problem and can't solve it after being stuck for long, AI comes to help
Writing GitHub README files	Delegate to AI (with review)	AI drafts documentation; I verify accuracy.
Building my department's website	Collaborate with AI	Agents help me generate components and ideas like how to use gsap, but I design and integrate them.
Researching web APIs for projects like Weather App	Delegate to AI (with review)	AI summarizes documentation while I confirm implementation details, and API security
Creating presentation slides for end-term sustainability reports	Delegate to AI (with review)	I use AI to summarise the content for a slide, then organise it according to me
Writing emails to faculty or club members	Delegate to AI (with review)	AI improves clarity, grammar and professionalism while I review before sending.
Planning weekly coding schedule to practice DSA	Collaborate with AI	If i ever get stuck on Codeforces problems, I use AI to get through it.
Fixing grammar in reports	Fully Automate	AI handles grammar and formatting efficiently.
Organizing notes from lectures	Delegate to AI (with review)	AI summarizes notes, and also makes them interactive while i verify important details

Task 2 -

Task	What "Done Well" Means
Analyzing environmental datasets (air quality, climate, etc.) using Python or Excel	The dataset is cleaned, analysis is accurate, graphs are correctly labeled, and conclusions are supported by the data with no calculation errors
Reading and summarizing environmental research papers	The summary captures the paper's objective, methodology, key findings, and limitations accurately in concise language without missing any important points
Designing website content to communicate environmental initiatives	The content is factually accurate, easy to understand, visually organized, mobile-friendly, and reviewed before publishing
